#### KUDOS & FEEDBACK

From 2022-23 Literature Search Survey and other direct patron feedback.

### STRATEGIC PRIORITY: NEW SOLUTIONS

### STRATEGIC PRIORITY: WE CULTURE

We are piloting a new adaptation of an intervention and needed to know what others are doing in this area. The search seemed extensive, wide and thorough, indicating limited published efforts in our area of interest

I was looking to support a young expectant mom who had bail hearing in attempts to support her attempts to be allowed to be kept together with her infant.

I love having this service. It saves so much time for someone with more skill to do the lit search for me so I can focus on finding answers for quality improvement projects.  
Thank-you

I received a robust and meaningful lit search on my topic and a prompt response to my subsequent article request.

My literature searching skills are very basic so it's very valuable to me to tap into this great Library Services resource.

Literature searches are extremely valuable. I wouldn't have time to do a deep dive into the research without the assistance. The literature search helps to improve patient care and services. Thank you!

The information provided has informed our working group on current trends in elective surgery optimization, what impact various optimization strategies have had, as well as illustrated patient screening tools that help with the process of individual optimization.

They are a great resource, are very knowledgeable and helpful. I really appreciate having access to a Library team as it helps me to stay current in my job as an OT.

I'm always happy with FH library services usually I find a way to share what I learn with others especially if it relates to patient care and improving care.

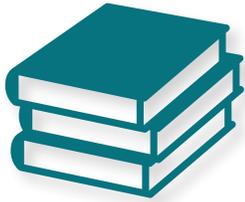

Very helpful updated search with extensive relevant references. It was for a mental health related clinical project which we are hoping to promote by publishing an article about it. Interaction was prompt and responsive to additional article requests.

I have used library services off and on over my 16 year career and always found the team very helpful, knowledgeable and efficient. This in turn allows me to complete my work in a timely manner.

Wanting a fresh approach on decreasing hospital acquired pneumonia and the site thought the use of incentive spirometry would be a good intervention. The research showed that deep breathing and coughing were just as effective and no cost was needed.

### STRATEGIC PRIORITY: FISCAL RESPONSIBILITY

**1,153**
