

If linens are provided by the MHSU Provider, a ready supply of bed linens and clean supplies should be stored in carts specific for this purpose, or lidded plastics cans or tubs. This provides ready access to supplies when they are needed, and ensures supplies remain clean and dry.

When linen is provided by the client, it is a good idea to suggest that extra supplies be available for necessary unscheduled linen changes when there is an increased incidence of client illness. The following table will assist with having a ready supply of protective clothing and equipment for care staff.

<b>Suggested List of Supplies</b>			
<b>Item</b>	<b>Stores Number/ Supply Company</b>	<b>Number of Items recommended</b>	<b>Number of items required to complete inventory</b>
