

Infection Prevention and Control Manual – Long-term Care

Part 1 – Introduction

IC1: Purpose

IC1:0100 Purpose of the Infection Prevention and Control Manual

The purpose of this manual is to provide Fraser Health long-term care (LTC) communities with infection prevention and control standards and guidelines based on current evidence-based practices, research and tools to support an effective and safe program for residents and staff.

All LTC communities must have an infection prevention and control program that reflects infection prevention and control principles.
