## Basic Wound Care Education for Long-Term Care and Assisted Living Nurses

### What's Happening?

To improve the learner experience and increase accessibility to the course, the LTC Basic Wound Care Education for nurses is being offered in a hybrid format with a virtual and an in-person session

The course has been redesigned into a 4-hour virtual day accompanied with a 4-hour in person workshop.

- The user must register for both sessions on the Learning Hub Curriculum course, number 36230 and must complete the virtual session first before attending the in person.
