

# Keeping you informed

## Documentation of C-19 and Influenza Immunizations

### What's happening?

- The province of BC has created a platform to record all C-19 and Influenza immunizations.
- Many of you may already be familiar with ImmsBC. ImmsBC is now accessible for all Long-Term Care and Assisted Living facilities.
- As we prepare for a fall respiratory immunization campaign - both Influenza and C-19, ImmsBC will be used to document both immunizations.

### How this may affect you?

It will be imperative that you have activated your facility on ImmsBC as well as ensured anyone who will be documenting has completed the training and has their own login.

#### Training:

- Training consists of 4 short videos, totalling 16 min.
- There is also twice weekly drop in support sessions
- ImmsBC command centre ( open 9am – 7pm)
  - Phone, zoom or email

#### Facility Set up

- Email the command centre to reactivate your clinic.
- If ImmsBC confirms you do not have your clinic created there is a QR code you can use to create one.

#### Individual User logins

- Via request to command centre. Whomever will be entering immunizations into ImmsBC will need their own login.

Please see the attached instructions which contain all the relevant contact information and links.

### Questions?

For general questions contact: [COVIDOutreachCoordinators1@fraserhealth.ca](mailto:COVIDOutreachCoordinators1@fraserhealth.ca)

For immsBC questions contact: [BCVAX-Support@gov.bc.ca](mailto:BCVAX-Support@gov.bc.ca)
