

Keeping you informed

Caring for a Resident with a Total Laryngectomy- LTC Webinar

What's happening?

This new Decision Support Tool (DST) took effect November 13, 2024

The purpose of this DST and form is to:

- Support staff to assess, monitor and care for residents with a laryngectomy with and without voice prosthesis in Long-Term Care (LTC) and Assisted Living (AL).
- Provide evidence informed tools for the prevention and identification of complications related to laryngectomy.
- Support and facilitate communication and timely documentation of information among the care team when caring for residents with a laryngectomy.

How this may affect you?

- This DST applies to all staff in LTC and AL settings.
- This DST provides clinical direction for the care of residents with a laryngectomy with and without a voice prosthesis.

Education:

Webinar is scheduled for December 17, 2024 1330-1430 via TEAMS
Invites to follow from Navdeep Dhillon
