

Keeping you informed

RAI Coding Webinar - Skin Condition - December 10th 2024

What's happening?

- During the past 2 years, long-term care communities have been working hard implementing initiatives and strategies to reduce pressure injuries and other skin conditions.
- The Fraser Health Regional LTCAL team has organized SOS (Save Our Skin) and WASA (basic wound care) education to support these community initiatives.
- The next step is to ensure RAI coding accurately reflects resident injuries and skin conditions.
- The Fraser Health Regional LTCAL team will be hosting a 1 hour webinar on RAI coding for pressure injuries and skin conditions. The webinar will include information for coding interRAI MDS 2.0 (Section M) and interRAI LTCF (Section L).

How this may affect you?

- All LTC leaders, coders and coordinators are invited to attend the webinar to review RAI MDS 2.0 Section M coding and to learn about interRAI LTCF Section L coding.
- **Education: Please look for the webinar invite scheduled for December 10, 2024, 10:00 – 11:00.**
