## Sent on behalf of the Fraser Health Integrated Long-Term Care and Assisted Living Services

**\*NEW \* Have you done a quality improvement project at your care community and want to show case it to other care communities?**

- See attached for Fraser Health's LTC quality improvement project summary document
- Our Quality Expansion team is building a quality improvement project inventory- we want to share and spread the great things our care communities are doing.
- Building an inventory will allow you to 'search' for various topics and see what other care communities have done so you don't need to start from scratch!
- Email [kirsten.rossiter@fraserhealth.ca](mailto:kirsten.rossiter@fraserhealth.ca) for more information or send your completed project summaries!
- If you are wondering who is on the Quality expansion team see below and contact anyone of them for comments or questions regarding quality, quality indicators or quality improvement
