

April 27th, 2022

## Sent on behalf of the Fraser Health Integrated Long-Term Care and Assisted Living Services

### \*UPDATE\* Suspect Case, Staff Case, Enhanced Monitoring/Outbreak Checklists

- Checklist updated to reinforce daily reporting of positive staff and resident cases to Public Health
- Removed reference to reporting of symptomatic clients and staff to Public Health
- Testing and Reporting to Public Health section added for clarity
- [Outbreak or Enhanced Monitoring - Fraser Health Authority](#)

### \*UPDATE\* Tools 27/28

- Removed reference to reporting of symptomatic clients and staff to Public Health and report positive case only
- [Reporting to Public Health - Fraser Health Authority](#)

### \*UPDATE\* Tools 27/28 Tips & Cerberus Instructions

- Documents updated to align with changes to Tools 27/28 and Checklists
- [Reporting to Public Health - Fraser Health Authority](#)

### REMINDER: Daily Ministry of Health Reporting of Active COVID-19 cases in Long Term Care

- All providers please continue to report on all **active** resident COVID-19 cases (this includes all residents who have tested positive and are on isolation) AND active staff cases (those who have tested positive and not yet returned to work)

\*Note\* Residents who have completed their isolation period and where their symptoms are resolved are no longer considered active cases.

- Please continue to send in your daily reports by 10am Monday to Friday *until further notice*. The reporting survey can be found here: [Daily Ministry of Health Reporting: LTC Active COVID-19 Cases Survey](#)
