

## **Tracheostomy Bedside Emergency Airway Kit Equipment List**

In **Community/Long-term Care areas**, spare Trach Tubes (same type and size) with gloves, water soluble lubricant and trach ties are commonly seen.

It is recommended to have:

- a spare tracheostomy tube - same size and one size smaller
- 10cc syringe
- 1 pack water soluble lubricant and obturator (to fit tube in situ if displaced)
- Manual Ventilation Unit with oxygen tubing
- Heat and Moisture Exchanger (HME)
- Flex tube and swivel adaptor connected and ready to be used
- Face mask
- 2 oral airways
