

29/Sept/2022

***NEW – Fraser Health long-term care videos for staff, residents and caregivers**

What is happening?

Fraser Health's Integrated Long-Term Care and Assisted Living team has produced a video series on long-term care.

Topics covered in the videos:

- [When is the right time for long-term care?](#)
- [How to prepare for long-term care?](#)
- [How to choose a long-term care home?](#)
- [What is provided in long-term care?](#)

Why?

We encourage you to watch, share and use these videos to inform conversations with your prospective residents and their families, and your staff about long-term care.

Considering sharing them:

- On your website
- When meeting prospective residents and their families
- During tours
- At staff huddles
- During employee orientation
- On move-in day
- On in-site/lobby televisions screens

(Please note: videos do not identify specific care homes and are geographically neutral.)

Where can I watch?

Videos are available on the [Fraser Health YouTube channel](#) and are hyperlinked above under 'topics'.
