NEW Getting to Know Dementia: A Guide to Diagnosis, Treatment and Care

- iCON (interCultural Online Health Network) “Getting to Know Dementia: A Guide to Diagnosis, Treatment and Care” information booklet was developed for the Chinese community, with culturally adapted content and images. It is available on the iCON website in both [English](#) and [Traditional Chinese](#).
- Fraser Health provides valuable resources to people living with dementia and their family caregivers, and is mentioned on pages 26, 35 and 37 of the English version.
- iCON supports multicultural communities, patients and caregivers across BC to optimize chronic disease prevention and self-management through community education, knowledge sharing, and technology.
- Please check the [iCON website](#) on a regular basis, so you are up-to-date on the culturally adapted events they are planning throughout the year.

NEW Opportunity to participate in Fraser Health (FH) LTC Report Review Shared working Group

- We are currently seeking LTC operators to participate in a review that we are undertaking of all FH LTC performance reports that are distributed to care communities.
- This review will be undertaken on an annual basis and will review the metrics, targets, benchmarks and distribution methods for each of the reports that are prepared and distributed.
- The recommendations will be brought back to the newly set up Data Quality Reporting Committee for approval.
- If you would like to participate in one of our working groups we would appreciate hearing from you! This is your chance to provide feedback on the data we provide, who we provide it to and how we send it.
- If you are interested or have any questions please contact Bindu Mohan at bindu.mohan@fraserhealth.ca
