

The Regional Immunization Outreach Team is expanding its services for specialized populations

What's happening?

- **Fraser Health's Regional Immunization Outreach Team is now providing immunizations to specialized populations in communities across Fraser Health**, such as under-served and vulnerable populations. It has transitioned to the organization's Population and Public Health department.
- **You will receive the same support that you have been receiving for COVID immunizations.**
- **The ordering process for vaccine and immunization support is described below.**
- **The team is committed to providing outreach clinics** in community locations, for populations identified as priorities by its partners and communities.

How does this affect you?

- To order vaccines, use a new form: <https://FHObservatory.checkbox.ca/PPH-Vaccine-Requests>
 - Choose "SPRI" as the vaccine request type.
- Please note that 48 hours' notice is required for all vaccine and outreach orders.
- Indicate on the form if immunization support is required.
- Vaccines will be available for pick up at most public health units using an updated process.
- Vaccine deliveries will only be available in special circumstances. Add a note when you complete the order form if you are requesting a delivery.
- If more support is required, contact Denise Thandi at denise.thandi1@fraserhealth.ca to discuss how the team may be able to provide it.
