NEW Trauma Care in Long-Term-Care & Assisted Living Advisory Committee Recruitment

- Stress in the workplace is an important concern with trends observed in the context of the COVID-19 pandemic that has potential to result in provider burnout, secondary traumatic stress, and deteriorating mental health.
- Fraser Health, in partnership with other stakeholders, created a core Trauma Resiliency Informed Practice (TRIP) curriculum that includes a facilitator development program. The core program requires adaptation to meet our population and staff needs.
- The committee is seeking 2-3 representatives from the north, south and east care communities to participate as advisors around trauma care in older adults (nurses, HCAs, allied health etc.)
- This is a time-limited advisory committee and the first meeting will be held in **August 2023**
- Please see attached KYI for more information and email your expression of interest to Anita.wahl@fraserhealth.ca by **July 4th, 2023**
