

Protect Yourself and Your Patients

...with the **right equipment** and the **right information**.

Do your part to ensure our patient's values are
Expressed, Documented, and Respected.

ASK YOURSELF:

- Do I know my patient's values, goals, and beliefs about their health and care?
- Has my patient appointed a **Substitute Decision Maker**?
- Does my patient have a **MOST**?
- Have I recorded what I know in the **FH Advance Care Planning Record**?
