

IC2:0900 Employee Health Program

1.0 PURPOSE

The purpose of an Employee Health program is to prevent transmission of infection between all employees and residents.

2.0 GUIDELINES

- 2.1 All employees should be familiar with the infection risks related to their employment and the appropriate prevention and outbreak control standards for their place of employment. See IC2:0300 Education of Employees
- 2.2 All employees should be aware of their requirements for immunization against infectious diseases.
