IC2:0110 Appendix I Surveillance Definitions

**COMPLETE ONE FORM FOR EACH INFECTION** and send completed form to ___________________________________________________

<table>
<thead>
<tr>
<th>DATE</th>
<th>FISCAL PERIOD</th>
<th>YEAR</th>
<th>SITE</th>
<th>UNIT</th>
<th>ROOM</th>
</tr>
</thead>
</table>

Date infection first noted: _____________________________ Date of (re)admission if < 1 month: _____________________________

Was there evidence of this infection at time of admission?  
☐ No  ☐ Yes

Risk Factors:  
☐ Non-ambulatory  ☐ Assist to transfer  ☐ Bed bound  ☐ Non-Intact Skin  
☐ Ulcer/wound present

Age:  
☐ < 60  ☐ 60–69  ☐ 70–79  ☐ 80–89  ☐ 90 or above

**NOTE:** Fever is defined as ≥ 38°C.

### INFECTION CATEGORY

(choose category box only after criteria have been met)

<table>
<thead>
<tr>
<th>INFECTION SITE (must meet criteria indicated)</th>
<th>CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Respiratory Tract</strong></td>
<td>Check all that apply.</td>
</tr>
</tbody>
</table>
| ☐ Common cold syndrome (Upper Respiratory Tract)  
**At least 2 criteria**  
Comment: fever may not be present, symptoms must be new, rule out allergies | ☐ runny nose or sneezing  
☐ sore throat or hoarseness or difficulty swallowing  
☐ nasal or sinus congestion  
☐ swollen or tender glands in neck (cervical lymphadenopathy)  
☐ Chest x-ray demonstrating pneumonia; (probable pneumonia, or infiltrate)  
☐ New or worse cough  
☐ Fever  
☐ New or increased sputum  
☐ Pleuritic pain  
☐ New or increased chest sounds, Rales, rhonchi, wheezes, bronchial breathing on chest exam  
☐ one or more of: new shortness of breath, increased respiratory rate (>25/min), worsening of mental or functional status |

| ☐ Pneumonia  
**Must have Chest x-ray plus 2 other criteria**  
Comment: rule out other noninfectious causes | ☐ New or worse cough  
☐ Fever  
☐ New or increased sputum  
☐ Pleuritic pain  
☐ New or increased chest sounds, rales, rhonchi, wheezes bronchial breathing on chest exam  
☐ one or more of: new shortness of breath, increased respiratory rate (>25/min), worsening of mental or functional status |

| ☐ Lower Respiratory Tract (bronchitis, tracheobronchitis, probable pneumonia)  
**At least 3 criteria**  
Comment: only make this diagnosis if no chest x ray or no confirmation of pneumonia on chest x-ray | ☐ New or worse cough  
☐ Fever  
☐ New or increased sputum  
☐ Pleuritic pain  
☐ New or increased chest sounds, rales, rhonchi, wheezes bronchial breathing on chest exam  
☐ one or more of: new shortness of breath, increased respiratory rate (>25/min), worsening of mental or functional status |

| ☐ Urinary Tract (includes only symptomatic UTI) | |

| ☐ UTI without catheter  
**At least 3 criteria** | ☐ Fever or chills  
☐ New or increased burning pain on urination, frequency or urgency  
☐ New flank or suprapubic pain or tenderness  
☐ Change in character of urine  
☐ New flank or suprapubic pain or tenderness  
☐ Change in character of urine  
**Clinical:** new bloody urine, foul smell or amount of sediment  
**Lab:** new pyuria or microscopic hematuria  
☐ Worsening of mental or functional status (may be new or increased incontinence) |

| ☐ UTI with catheter  
**At least 2 criteria** | ☐ Fever or chills  
☐ New flank or suprapubic pain or tenderness  
☐ Change in character of urine |

### INFECTION CATEGORY
(check category box only after criteria have been met)

**INFECTION SITE**
(must meet criteria indicated)

**CRITERIA**
Check all that apply.

<table>
<thead>
<tr>
<th>Skin Infections</th>
<th></th>
<th></th>
</tr>
</thead>
</table>
| □ Cellulitis/ soft tissue/ wound | At least 1 criterion | □ pus at a wound, skin or soft tissue site  
Or 4 or more of the following:  
□ fever > 38°C taken at any site  
□ worsening mental/functional status  
□ new or increasing signs/symptoms at the affected site  
□ heat at site  
□ swelling at site  
□ redness at site  
□ tenderness or pain at site  
□ serous drainage from site |
| □ Fungal | Must have BOTH criteria | □ maculopapular rash, and  
□ either physician diagnosis or lab confirmation |
| □ Herpes Simplex | Must have BOTH criteria | □ vesicular rash; and  
□ either physician diagnosis or lab confirmation |
| □ Herpes zoster (shingles) | Must have BOTH criteria | □ vesicular rash; and  
□ either physician diagnosis or lab confirmation |
| □ Scabies | Must have BOTH criteria | □ maculopapular and/or itching rash, and  
□ either physician diagnosis or lab confirmation |

<table>
<thead>
<tr>
<th>Eye, Ear, Nose and Mouth</th>
<th></th>
<th></th>
</tr>
</thead>
</table>
| □ Conjunctivitis | At least 1 criterion | □ pus from one or both eyes, present for ≥ 24 hrs  
□ new or increased conjunctival redness, with or without itching or pain, present for ≥ 24 hrs (pink eye) |
| □ Ear Infection | At least 1 criterion | □ diagnosis by physician or nurse practitioner of ear infection  
□ drainage from one or both ears (non purulent drainage must be accompanied by additional symptoms such as ear pain or redness) |
| □ Mouth or peri-oral (including oral candidiasis) | | □ diagnosis by physician or dentist |
| □ Sinusitis | | □ diagnosis by physician |

| Systemic Infections |                      |                      |

---

**Definitions**

- **Clinical**: new bloody urine, foul smell or amount of sediment  
- **Lab**: new pyuria or microscopic hematuria  
- **worsening of mental or functional status (may be new or increased incontinence)**

**TO BE COMPLETED POST INFECTION**

1. Was resident transferred to Acute Care due to this infection?  
   - [ ] Yes  
   - [ ] No

2. Was culture done?  
   - [ ] Yes  
   - [ ] No
   If Yes; Date: ____________________ Sites: ______________________ Organisms: __________________________________

3. Final outcome: at end of infection, resident was:  
   - [ ] In same or better condition as at onset  
   - [ ] More dependent than at onset  
   - [ ] Transferred to another facility or home  
   - [ ] Deceased
