MEDITECH Order Entry for Patient Medication Refills

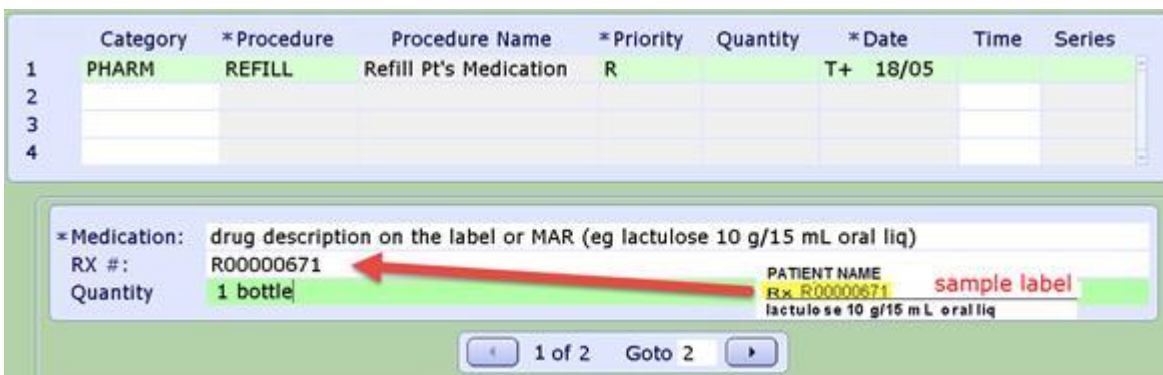

What's Happening?

Patient medication refill requests for the following can be sent directly to Pharmacy Services using MEDITECH Order Entry (OE):

- Missing doses,
- Replacement of dropped/wasted dosages, and
- Depleted supply of a multi-dose container (e.g. creams and inhalers).

On **May 30, 2018**, the OE screen will be streamlined to only require entry of information needed by Pharmacy Services to process the medication refill.

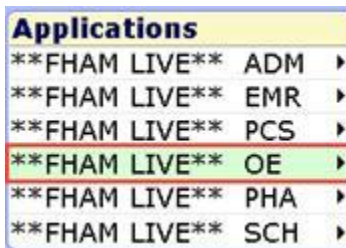

The updated OE screen will look like the image below:

Medication	Enter the drug description as it appears on the label or MAR
RX #	Prescription number is found on the label below the patient's name. Enter this if readily available.
Quantity	Enter a quantity

To request patient medication refills:

- Step 1: Select ****FHAM LIVE** OE**

- Step 2: Select **Orders Desktop**

How Will This Impact Students and Faculty Instructors?

Students and faculty instructors who are completing student placements in Fraser Health are expected to follow this practice change to ensure that patients, clients, and residents continue to receive safe and quality care.
