Langley Memorial Hospital

Upgrades underway to improve care

Several areas of Langley Memorial Hospital are under construction. The work is part of capital development projects to upgrade and expand our facilities and enhance care closer to home.

Projects include an emergency department expansion and significant infrastructure upgrades in areas throughout the hospital.

All hospital services remain open during construction

During construction, the hospital and emergency department, including the emergency drop-off area remain open and continue to provide safe, exceptional care and support to patients and families.

Construction activities may impact parking and roadways. Please allow for extra time when arriving for appointments.

Visitors to the site are asked to follow the pedestrian walkway signs to access hospital entrances. You can also reference the map in this brochure.

Visitor and Patient Parking

Parking is available to all patients and visitors in designated spaces:

- **Main parking lot:** entire lot is reserved for patients and visitors: 6:00 a.m. - 6:00 p.m.
- **East parking lot:** front sections, closest to the hospital are reserved for patients and visitors: 7:00 a.m. – 2:30 p.m.

For parking information, contact **LMC Parking Administration at 604-930-5440**

Need help?

If you need help finding your way around the hospital, please connect with our site volunteers. You can find them at the information desk located just inside the hospital's main entrance.
