

## Construction Notice for Neighbours

March 15, 2017

### Drone video flight planned for this Monday

**What's Happening** A video drone will be flying over the hospital on Monday afternoon, March 20<sup>th</sup>

**Area Affected/Scope of work** Video footage of the entire hospital campus will be taken for an historical record 'before' mental health facility construction, weather permitting.

**You may see the drone:**

- around the construction site that's between Allen Street and Keary Street, including the lane running from Sherbrooke Street to Keary Street
- along Sherbrooke, East Columbia, and Keary Streets
- over the industrial park east of Brunette Avenue
- over the hospital's main entrance.

**We expect filming to take several hours** and will be done by [UAviation](#), a qualified, experienced, and licensed drone operator.

**We have alerted the necessary authorities** including Transport Canada, the City of New Westminster, BC Air Ambulance, police, and Fraser Health. UAviation's team will ensure Transport Canada guidelines are met which require a 100-foot (30-metre) safety perimeter around the drone's launch site, flight path and landing area.

**The drone will be 'grounded'** if any helicopters arrive during filming.

**Impact to You** **Our neighbour's privacy will be respected.** Footage intends to capture the current state of the hospital, not of the neighbourhood. Any footage used in future videos will be edited to respect personal privacy.

**The drone's flight path will not interfere with any neighbourhood construction cranes.**

**Questions** **Questions about the drone flight** can be directed to Ali Miri at 778.989.4828.

**Questions about the hospital's redevelopment** can be directed to Leslie-Ann at 604.219.8961
