

Construction Notice for Neighbours

July 28, 2017

(NEW DATE) West half of Allen Street will close as of August 1

Our [April 3rd Construction Notice](#) alerted you to this closure, which was expected to happen in mid-April but which Bird Construction later postponed, possibly to October or November.

Bird Construction has told us they are now ready to start this work.

What's Happening As of August 1, the west half of Allen Street will close until late 2019/early 2020

Area Affected/Scope The portion of Allen Street from just west of Copperstone's south parkade entrance to the hospital's road/lane will be fenced and excavated. Construction storage trailers will be installed and stay in place until all construction on the new mental health facility finishes.

Once construction finishes the road will be repaved, a sidewalk will be added on the south side of Allen Street, and the plan is to install [bollard posts](#) in the lane which would prevent access to Allen Street via the hospital's private service lane.

Impact to You Public vehicle traffic will no longer be possible between Allen Street and Sherbrooke Street or Keary Street via the hospital's service lane.

The sidewalk will remain open on the north side of Allen Street, but may be disrupted at times.

Residents of Copperstone will still have access to their south parkade.

Please obey all construction flaggers. They're there for your protection.
