

Construction Notice for Neighbours

March 15, 2017

Expect drone over the east construction site

What's Happening A video drone will fly over the construction site at the east side of the hospital on Monday, March 19 from 11:30am to noon, and likely once per month for the rest of the year

Area Affected/Scope The drone will film progress at the construction site, weather permitting. You may see it flying above Allen Street, Keary Street, and the construction site off of Brunette Avenue.

Filming will be done by [UAviation](#), a qualified, experienced, and licensed drone operator.

We have alerted the necessary authorities including Transport Canada, the City of New Westminster, BC Air Ambulance, police, and Fraser Health. UAviation's team will ensure Transport Canada guidelines are met which require a 100-foot (30-metre) safety perimeter around the drone's launch site, flight path and landing area.

The drone will be 'grounded' if any helicopters arrive during filming.

Impact to You Our neighbour's privacy will be respected. Footage intends to capture construction progress, not neighbourhood activity. Any footage used in future videos will be edited to respect personal privacy.

The drone's flight path will not interfere with any neighbouring construction cranes.

Questions Questions about the drone flight can be directed to Ali Miri at 778.989.4828.

Questions about the hospital's redevelopment can be directed to Leslie-Ann at 604.219.8961 or feedback@fraserhealth.ca. Thank you.
